HYDERABAD: All the zonal commissioner of the Greater Hyderabad Municipal Corporation (GHMC) have been directed to set up 400 Reverse Osmosis (RO) plants near each building with a water facility.

"The plants should be established in the localities with maximum population," Hyderabad mayor Majid Hussain said.

The mayor, along with GHMC commissioner Somesh Kumar, held a review meeting with all the additional commissioner, zonal commissioners, deputy commissioners and the heads of various departments at the standing committee hall here Sunday. Issues like the RO plants, Muskan, five food scheme and preparatory arrangements for seasonal diseases were discussed in the meeting.

Majid Hussain directed officials to set up 1,500 Muskan centres as per the budget allotment. Muskan is a community-managed play school for deprived children who cannot afford to go to school. Each centre houses as many as 40 children in a community hall or a private building.

On the five meal scheme, the mayor said as many as 50 centres had been allocated for the scheme of which eight are functional in different parts of the city and directed officials to set up new centres in vicinity of hospitals, labour addas and weaker section colonies.

Somesh Kumar urged zonal commissioners to suit reports regarding the establishment of the proposed centres within the next three days.

"A 45-day training camp will be held for teachers of Muskan centres," the GHMC commissioner said and questioned as to why the scheme cannot be successful in Hyderabad when it has been effectively implemented in rural areas of Andhra Pradesh.

Somesh Kumar also directed engineering officials to concentrate on road development works including lane marking and signages. "All main roads will be controlled by the central control system for the ensuing metropolis conference," he added.
